

# The Glasshouse Hotel, Edinburgh

“Being in the 5 star service industry we are consistently looking at ways in which we can improve our guest’s experience. We recently purchased bespoke business centers for our two hotels in Edinburgh “The Glasshouse” and the “Scotsman Hotel” which Intelligent Furniture created for us. The business desks are beautifully created and the service provided by Intelligent Furniture both prior to installation and post installation has been first class to the point that I would have no hesitation in highly recommending this service to any business which is looking for stylish and functional furniture with service to match that of a five star hotel.” Daniel Pereira, General Manager
